

DANIEL QUERALES

Junior Machine Learning Engineer

An Electrical Engineer (with a major in electronics and computer science) with a background in maths, probability and statistics looking for an entry level data science position. Familiarized with languages like R, Python and SQL; tools like Git, Flask, Spark, Tableau, Google Data Studio, Excel and Power BI; also some knowledge with cloud platforms like Microsoft Azure and AWS. Experienced with data activities like cleaning, transformation, analysis, modelling, prediction and visualization.

PROJECTS

Predicting Stock Prices with Linear Regression - [View on GitHub](#)

- Predicted Tesla (TSLA) stock historic prices using a linear regression model to identify trends.
- Explored prices (adjusted close, volume, market cap, volatility) with Python tools like Pandas, Numpy and Plotly.
- Achieved 98% in R2-Score using the model with test values.

Customer Segmentation - [View on Github](#)

- A unsupervised model project for clustering customers for a marketing campaign.
- Conducted data cleaning techniques (like outliers, nulls), preparation and transformation of the customer dataset. Performed exploration and visualization.
- Used K-means model with WCSS and Silhouette averages for scoring performance.

Product Recommendations for Retails - [View on Github](#)

- An apriori algorithm project for product recommendations for a retail store.
- Queries for most popular items, best month for sales and products often sold together.
- Used Apriori for mining frequent products sets and relevant association rules to make products recommendations.

Web API deployment: Sentiment Analysis - [View on Website](#)

- Developed a text classifier model for sentiment analysis of movies reviews to reduce human intervention.
- Vectorized the text reviews for their use by the SVC classifier model, then created a pipeline to automate the input preprocessing to increase accuracy performance.
- Deployed an API with Flask to use the model with a HTML forms.

EDUCATION

Engineer's Degree in Electrical Engineering | 2008-2019

Universidad Central de Venezuela

Mention in Electronics, Computer Science and Control Systems.

WORK EXPERIENCE

Freelancer | 2019-2022

Data Science, Hardware Description, Numerical Methods and Control Systems.
