

DANIEL QUERALES

Entry-Level Data Analyst

SUMMARY

Electrical Engineer (with a major in electronics and computer science) with a strong background in maths, probability and statistics looking for an entry level data science position. Familiarized with languages like Python and SQL; tools like Git, Tableau, Excel and Power BI; also some knowledge with cloud platforms like Microsoft Azure. Experienced with data activities like cleaning, transformation, analysis, prediction and visualization.

PROJECTS

Data Exploration: Two years of COVID-19

- A data exploration project of the COVID-19 dataset.
- Used MySQL to explore the values of total cases, total deaths & people fully vaccinated.
- The data was visualized with Tableau Public tools.

Predicting Tesla Stock Prices

- A machine learning project of the Tesla (TSLA) stock historic prices dataset to predict stock prices using a linear regression model.
- Some data exploration of the prices (adjusted close, volume, market cap, volatility) with Python tools like Pandas, Numpy and Plotly.

Customer Segmentation: Clustering

- A unsupervised machine learning project for clustering customers for a marketing campaign.
- Data cleaning (like outliers, nulls), preparation and transformation of a customer dataset. Also exploration and visualization of features.
- Used Kmeans clustering with WCSS and Silhouette averages for scoring.

Fraud Detection for Bank Transactions

- A logistic regression project for fraud detection in finance environments.
- Used classic, gaussianNB, svc and random forest models for detection.
- Assessed performance with accuracy, precision and recall scores. Plot ROC curves to visualize AUC (area under curve).

EDUCATION

Engineer's Degree in Electrical Engineering | 2008-2019

Universidad Central de Venezuela

Mention in Electronics, Computer Science and Control Systems

WORK EXPERIENCE

Freelancer | 2019-2022

Hardware Description, Numerical Methods and Control Systems
