

# DANIEL QUERALES

## Data Scientist

*An Electrical Engineer currently involved in Data Science. Familiarized with languages like R, Python and SQL; tools like Git, Spark, Flask, Tableau, Excel and Power BI; knowledge with cloud platforms like Microsoft Azure, GCP and AWS. Experienced with data activities like cleaning, transformation, analysis, prediction and visualization.*

## PROJECTS

### Data Exploration: Two years of COVID-19 - [View on GitHub](#)

- Interpreted successfully the data from the COVID-19 dataset to explore the development of the pandemic.
- Utilized MySQL to analyse the values of total cases, total deaths & people fully vaccinated.
- Built a dashboard in Tableau Public to report key metrics.

### Sales Analysis: Electronics Store - [View on GitHub](#)

- Performed an analysis of the sales records to discover opportunities to increase revenues.
- Extracted insights about the best products sales, the best months for sales, products often sell together and most frequent hour for sales.

### Web APP deployment: Sentiment Analysis - [View WebApp](#)

- Developed a text classifier model for sentiment analysis to reduce human intervention.
- Vectorized text reviews for their use by the SVC classifier model, then created a pipeline to automate the input preprocessing to increase accuracy performance.
- Deployed the model as an Web Application using Streamlit.

### AutoML: Automated Machine Learning Workflow - [View WebApp](#)

- An automated machine learning workflow for classifiers models.
- Created a preview report from the uploaded data using pandas profiling.
- Prepared, cleaned and trained the model using AutoML Pycaret.

## EDUCATION

### Engineer's Degree in Electrical Engineering | 2008-2019

*Universidad Central de Venezuela*

Electronics, Computer Science and Control Systems.

## WORK EXPERIENCE

### Data Scientist | 2022-Present

*QUASH.ai*

Entry-Level Data Scientist.

### Freelancer | 2019-2022

*Freelance*

Data Science, Hardware Description, Numerical Methods and Control Systems.
